## Home Heating Safety — Fall 2022

As consumers, we're all experiencing the impacts of the current economic inflation, rising energy costs included. Over the past year, average heating oil prices have increased 50%; natural gas by 18%; and propane by 42%; to some of the highest prices in decades.

Heading into the winter heating season, higher heating costs can put a strain on household budgets and make alternative heating sources an attractive solution.

Keep your home warm and your family safe this winter by reviewing these secondary heat source safety recommendations and taking preventative steps to avoid an accident. <u>View this PDF</u> from our colleagues at <u>MMG Insurance</u>.
